

## Who Are We?

Corporate Medical Management has integrated several area of specialized health and security services under one roof,.....your roof!

We offer a single or combined package of Medical Services, including Medical Exams, Cholesterol Screenings, Lab Services, Injury Prevention, Drug & Alcohol Education, along with Security Services including Background Checks, Drug Screenings, Drivers License and SS# Verification. We are able to provide your company with the ability to accomplish all of the pre-employment and continued screening you require. These services can be seamlessly integrated into your organization. This allows Management to focus on the growth and health of your organization with confidence.

Already aware of the excellence provided to the Fire and Law Enforcement Departments, by Public Safety Health and Wellness ®, clients requested the same opportunities for immediate mobile health services on site for the corporate world. Corporate Medical Management was soon developed to meet this growing need for occupational health and security through an economical and efficient system for businesses.

Internet websites continue to allow innocent people to be violated and Corporate Medical Management takes the security and privacy of your employees seriously and understands the vulnerable position company leaders are put in daily. Your company's health and security and the health and security of your employees is paramount in today's fast paced internet based world. Let us educate and protect you from easy, yet hard lessons learned.

## Why Do You Need Us?

The background investigative division of Corporate Medical Management, Along with our Drug Testing and DOT exams, Injury Prevention Programs are the most rapidly growing areas of our business, due to the current and future legal issues facing our clients. New and tighter state legislation, and new DOT examiner certification regulations are soon to be released by the Federal Motor Carrier Safety Administration (FMCSA). These regulations will require every motor carrier to have an examination by a certified healthcare provider to determine their medical and physical ability to operate a commercial vehicle using strict federally mandated criteria. These exams will no longer be able to be performed by any medical provider performing them currently, but only those certified by the FMCSA.

Medical exams, drug screening, injury prevention, exercise programs and background checks **save you money**. Have knowledge --- Employ healthy and secure people and a healthy and safe company will be your return on investment.

**Your company's health and security is our business.**

## Security and Research Division

Directed by Lieutenant Jeff Braley, the Security & Research Division of Corporate Medical Management is available for your timeframe, confidentiality and understands your demands for safety in your workplace.

Lt. Braley has an extensive security background as a police investigator and as an expert in internet cyber-crime. He has also been recognized by his peers as "Investigator of the Year." These qualifications and experience ensure the quality of the operation is well above other background search companies.

The information collected in background investigation is superficially uncovered, however it is the human interpretation of this information that is most important to you. Corporate Medical Management understands your concerns and liabilities. Lt. Braley's experience sets our service apart from all others in the marketplace.

Our investigation client list remains confidential. Each client also has the opportunity to set up a custom made program tailored to fit your own unique needs, whether it is a routine employee screening for arrest records or an extensive background investigation for an executive candidate.

### Security Services:

- Criminal and FBI Background Checks
- Prior Employment
- Financial
- Drivers License verification
- Social Security Number verification
- Drug Collection & Screening
- Drug and Alcohol Education

## Medical Division

Directed by Dr. William Lovett, the Medical Division of Corporate Medical Management was founded for the purpose of convenience, confidentiality and to tackle "out of the box" issues that cause CEO's to become concerned with the health of their organization.

With a long list of earned credentials and qualifications, Dr. Lovett's passion is understanding the occupational demands on your employees and implementing checks and balances to ensure their health and safety in a safe, convenient and clinical atmosphere.

**"I believe there will be a change in mentality from Injury Management and Rehabilitation to Early Prevention, and Health & Wellness."**

Dr. Bill Lovett

Future trends will show more funding of pre-hire and annual background screening, drug testing, psychological testing and mandatory annual physical exams. Employee health and wellness contracts are a reality and expectation of a "healthy" corporate setting.

Corporations are challenged to keep health care costs to a minimum in order to continue offering basic coverage. Corporate Medical Management takes on the challenge for you.
